HEALTHY FOOD AND DRINK IN NSW HEALTH FACILITIES FOR STAFF AND VISITORS FRAMEWORK

Healthy choices in health facilities

Toolkit
WHY MAKE HEALTHY FOOD AND DRINK NORMAL IN NSW HEALTH FACILITIES?

THE WORLD WE LIVE IN HAS CHANGED...

- Portion sizes have increased
- Many of us spend hours sitting at work
- We are time poor and want quick and convenient food options

We are surrounded by unhealthy foods and drinks at work, at the shops and in public places like hospitals and schools.

ADULTS IN NSW

- Only 7% eat the recommended amount of vegetables
- Only 54% eat the recommended amount of fruit

1 in 5 children in NSW are overweight or obese

POOR DIET AND OBESITY ARE MAJOR CONTRIBUTORS TO CHRONIC DISEASE IN AUSTRALIA

THIS POSES SERIOUS CHALLENGES TO THE HEALTH OF OUR COMMUNITIES...

1 in 5 children in NSW are overweight or obese

POOR DIET AND OBESITY ARE MAJOR CONTRIBUTORS TO CHRONIC DISEASE IN AUSTRALIA

IT’S TIME TO MAKE HEALTHY FOOD AND DRINK NORMAL IN OUR HEALTH FACILITIES

NSW HEALTH IS LEADING THE WAY

The Healthy Food and Drink in NSW Health Facilities for Staff and Visitors Framework makes the healthy choice an easy choice for our staff and visitors by:

- Increasing the availability of healthy foods and drinks
- Decreasing the availability of unhealthy foods and drinks
- Removing sugary drinks from sale

We need everyone’s support to make healthy food and drink normal.

THE FRAMEWORK FOR HEALTHY FOOD AND DRINK IN NSW HEALTH FACILITIES FOR STAFF AND VISITORS

Modelling the provision of healthy food and drink

Making healthy food and drink normal for our staff and visitors

Building on our successes

FOOD AND DRINK BENCHMARK

LOCAL IMPLEMENTATION

MONITORING AND EVALUATION
INTRODUCTION

SUMMARY OF THE FRAMEWORK

The Healthy Food and Drink in NSW Health Facilities for Staff and Visitors Framework (the Framework) provides a set of best-practice guidelines for NSW Health facilities to use in working towards providing healthy food and drink in their food outlets. The Framework applies to food outlets where foods and drinks are available to staff and visitors in NSW Health facilities. The food outlets include:

- Cafés and cafeterias
- Kiosks and coffee carts
- Vending machines
- Convenience stores and newsagents
- Other leased retail premises that sell foods or drinks, such as florists and pharmacies
- Catering provided at functions, meetings, and special events, for example meetings with external partners or workshops

The Framework applies to all foods and drinks, including packaged foods and drinks as well as those that are prepared on- or off-site.

The Framework does not apply to foods and drinks:
- provided to in-patients; brought in from home; prepared in a health facility for outside client groups; and fundraising activities, including those run by volunteers.

Some Health facilities may choose to include fundraising in their implementation. We also ask for the support of fundraisers to make healthy food and drink normal in their fundraising activities.

The Framework sets out best-practice guidelines to achieve healthy food and drink in NSW Health facilities through its three elements: Food and Drink Benchmark, Local Implementation, and Monitoring and Evaluation.

PURPOSE OF THE TOOLKIT

This Toolkit provides practical guidance for NSW Health facilities tasked with leading implementation of the Framework by setting out detailed recommendations and tools across the three elements:

The Food and Drink Benchmark provides guidance to use when choosing which foods and drinks to provide and market to staff and visitors.

Local Implementation presents examples from Local Health Districts on making healthy food and drink normal in their respective health facilities. Considerations for local implementation teams are also provided alongside supporting tools for retail leases, and guidance on what a successful project is likely to include.

Steps to monitor and report on a standard set of practices, a timeline, and the benefits of using an electronic tool to carry out these steps are summarised in Monitoring and Evaluation.

“Adopting the Framework is a step towards making healthy foods and drinks normal in NSW Health facilities and is an initiative we can all embrace.”

Dr Kerry Chant PSM, Chief Health Officer and Deputy Secretary Population and Public Health

For more information about the Framework, please see the Healthy Food and Drink in NSW for Staff and Visitors Framework.

SUMMARY OF THE FOOD AND DRINK BENCHMARK

To make healthy food and drink normal in our Health facilities, the Food and Drink Benchmark:

- Promotes and increases the availability of healthy food and drink options.
- Decreases the availability of unhealthy food and drink options.
- Supports water as the best beverage choice.

Normalising healthy food and drink can be achieved by:

- Increasing the **product availability** of healthy options by providing a large proportion of **Everyday** foods and drinks.
- Promoting **product quality** using the **Health Star Rating System** with 3.5 stars or above as an indicator of the healthier options.
- Making smaller **portion sizes** more widely available for some **Everyday** and all **Occasional** foods and drinks.
- Using **Marketing** techniques to ensure the **Everyday PRODUCTS** are in the right **PLACE** at a favourable **PRICE** and are **PROMOTED**.

The Food and Drink Benchmark is underpinned by the Australian Dietary Guidelines\(^2\)

---

**EVERYDAY FOODS AND DRINKS** are meals, snacks, and drinks made from foods in the five food groups. They are to make up 75% or more of the offering. For example, sandwiches, soups, pasta dishes, yoghurt, and fruit.

**OCCASIONAL FOODS AND DRINKS** are foods high in saturated fat, sugars and/or salt and often have little nutritional value. They are to make up no more than 25% of the offering. For example, pies, chips, sweet muffins, and confectionery.

---

These four focus areas will be monitored against a set of key practices which are illustrative of **product availability**, **product quality**, **product size**, and **marketing**.

<table>
<thead>
<tr>
<th>FOCUS AREA</th>
<th>To promote and increase the availability of healthy food and drink options</th>
<th>To decrease the availability of unhealthy food and drink options</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>PRODUCT AVAILABILITY</strong></td>
<td>Everyday foods and drinks will make up 75% or more of the total food and drink offering</td>
<td>Occasional foods and drinks make up no more than 25% of the total food and drink offering AND Sugary drinks are not sold</td>
</tr>
<tr>
<td><strong>PRODUCT QUALITY</strong></td>
<td>A Health Star Rating of 3.5 Stars and above applies to some Everyday foods and drinks</td>
<td>A Health Star Rating of 3.5 Stars and above applies to some Occasional foods and drinks</td>
</tr>
<tr>
<td><strong>PRODUCT SIZE</strong></td>
<td>Portion size limits will apply to some Everyday foods and drinks</td>
<td>Portion size limits apply to all Occasional foods and drinks</td>
</tr>
<tr>
<td><strong>MARKETING</strong></td>
<td>Prominent locations in a food outlet, value pricing, and promotional activities will highlight Everyday foods and drinks</td>
<td>Prominent locations in a food outlet, value pricing, and promotional activities do not highlight Occasional foods and drinks</td>
</tr>
</tbody>
</table>
Provide Everyday meals, snacks, and drinks made from foods in the five food groups. These foods and drinks are to make up 75% or more of the offering.

Tool 1: Ready Reckoner and Tool 2: Online food and drink product information give extensive examples of meals, snacks, and drinks that meet the Food and Drink Benchmark.

Tool 1: Ready Reckoner
Examples of Everyday and Occasional meals, snacks, and drinks that meet the Food and Drink Benchmark.

Tool 2: Online food and drink product information
A tool to help you find out which branded foods and drinks meet the Food and Drink Benchmark (to be available end 2017).

Both packaged and freshly prepared foods and drinks can be provided.

Packaged foods

Examples of Everyday packaged foods – to make up 75% or more of the offering

- Sandwiches/wraps
- Ready-to-eat pasta
- Ready-to-eat stir-fries
- Soups
- Cheese and crackers
- Yoghurt
- Dried fruit and nuts
- Muesli bars
Healthy recipes and meals are those that are made from Everyday foods and ingredients.

- Use Tool 1: Ready Reckoner to identify appropriate basic cooking ingredients, such as sauces, herbs, spices, etc, which you can combine with Everyday ingredients to make Everyday meals and snacks.
- Increase your range of Everyday foods by making existing options healthier: for example make sandwiches healthier by using mostly Everyday fillings, such as lean skinless chicken, tuna, lean beef, egg or hummus, plus salad.
- Use Tool 3: Recipe Flow chart shows you how to determine if an existing recipe is Everyday or Occasional.

**Tool 3: Recipe Flow chart**

Flowchart to determine if recipes are Everyday or Occasional.

Adding an Occasional food ingredient (for example chicken schnitzel) to an Everyday food (for example wholemeal bread) makes the end product (chicken schnitzel sandwich) Occasional.

**Examples of Everyday freshly prepared foods – to make up 75% or more of the offering**

- Salad
- Sandwiches /wraps
- Sushi roll
- Pasta
- Stir fries
- Curry
- Vegetables and dips
- Fruit salad and yoghurt

Healthy choices in health facilities NSW HEALTH
The strongest evidence for a link between sugar intake, and overweight and obesity is for the consumption of sugary drinks. Water is always the healthiest drink to sell, but there are plenty of other popular, healthier options to choose from as well.

**Examples of healthier drinks to sell**

- **Water**
- **Plain and flavoured milk**
- **99% Fruit juice**
- **Smoothies/Milkshakes**
- **Tea or Coffee**
- **Diet drinks**

**What is a sugary drink?**

- Sugary drinks are drinks with no nutritional value and which have any sugars added during processing (this excludes milk drinks).
- Sources of sugar to sweeten drinks include the ingredients sucrose (commonly called sugar), fructose, glucose, honey, and fruit juice concentrate.
- Sources of sugar are listed in the ingredients of a Nutrition Information Panel which can be found on the back of most packaged foods and drinks.
- Examples of sugary drinks are soft drinks, some flavoured waters, fruit drinks, cordials, iced teas, energy drinks, and sports drinks.
- Why can 99% fruit juice and milk drinks be sold? Juices with no added sugar and flavoured milks can be sold because they do have nutritional value. However, maximum portion size limits apply to these drinks, and the Health Star Rating is used for flavoured milks to ensure healthier versions are selected.

---

**PRODUCT AVAILABILITY**

**Sugary drinks are not sold in NSW Health facilities**

**Examples of healthier drinks to sell**

- **Water**
- **Plain and flavoured milk**
- **99% Fruit juice**
- **Smoothies/Milkshakes**
- **Tea or Coffee**
- **Diet drinks**

**What is a sugary drink?**

- Sugary drinks are drinks with no nutritional value and which have any sugars added during processing (this excludes milk drinks).
- Sources of sugar to sweeten drinks include the ingredients sucrose (commonly called sugar), fructose, glucose, honey, and fruit juice concentrate.
- Sources of sugar are listed in the ingredients of a Nutrition Information Panel which can be found on the back of most packaged foods and drinks.
- Examples of sugary drinks are soft drinks, some flavoured waters, fruit drinks, cordials, iced teas, energy drinks, and sports drinks.
- Why can 99% fruit juice and milk drinks be sold? Juices with no added sugar and flavoured milks can be sold because they do have nutritional value. However, maximum portion size limits apply to these drinks, and the Health Star Rating is used for flavoured milks to ensure healthier versions are selected.

---

*Milk drinks are drinks where the predominant ingredient is dairy milk or a calcium-fortified dairy-milk-alternative, such as fortified soy/almond/rice milk.*
Use the Health Star Rating System for some Occasional and Everyday packaged foods to identify the best quality – choose products with 3.5 stars or above.

Tool 1: Ready Reckoner gives examples of Everyday and Occasional foods and drinks that meet the Food and Drink Benchmark.

Tool 2: Online food and drink product information shows which branded foods and drinks meet the Food and Drink Benchmark (to be available end 2017).

What is the Health Star Rating?
The Health Star Rating System is a quick and easy way to compare the nutrient content of similar packaged foods. It scores the overall nutritional content of packaged foods and rates them from ½ a star to 5 stars. The more stars the healthier the choice.
The Health Star Rating of 3.5 stars and above will apply to some Everyday and all Occasional foods and drinks. See Tool 1: Ready Reckoner to determine which food and drink categories need to score a Health Star Rating of 3.5 stars or above to meet the Benchmark.

Why 3.5 stars?
NSW Health research on over 10,000 products showed most healthy foods and drinks scored 3.5 stars and above, while most unhealthy ones scored below 3.5 stars.

How are the Health Star Ratings calculated?
Foods are given a Health Star Rating based on their energy (kilojoule) content, as well as a balance of less healthy nutrients (saturated fat, salt and sugar) and more healthy nutrients (dietary fibre, protein and proportion of fruit, vegetable, nut and legume content).

What doesn’t it do?
The Health Star Rating is based on nutritional information per 100g (or 100ml for liquids) and not portion (serving) size so it tells you how healthy a product is, but doesn’t tell you how much is healthy to eat. To account for this, the Food and Drink Benchmark recommends portion size limits for relevant product categories.

How can I find the Health Star Rating of a product?
There are websites and mobile phone apps available where you can obtain Health Star Rating information for a range of products such as www.foodswitch.com.au

The Health Star Rating system applies only to packaged foods, so fresh foods like meat from the butcher or fresh vegetables from the supermarket are not included. Most of these foods are Everyday foods.

For more information visit the Health Star Rating website www.healthstarrating.gov.au
Make smaller portion sizes more widely available for some Everyday and all Occasional foods and drinks.

**Tool 1: Ready Reckoner** gives examples of Everyday and Occasional meals, snacks, and drinks that meet the Food and Drink Benchmark.

**Tool 4: Visual portion guide** shows the recommended maximum portion sizes for commonly available foods and drinks in an easy-to-use visual that doesn’t require the use of weighing scales.

### Examples of foods and their maximum portion size

<table>
<thead>
<tr>
<th>Food</th>
<th>Maximum Portion Size</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flavoured milk</td>
<td>500mL</td>
</tr>
<tr>
<td>Cakes/muffins</td>
<td>80g</td>
</tr>
<tr>
<td>Confectionery</td>
<td>50g</td>
</tr>
<tr>
<td>Salty snacks</td>
<td>50g</td>
</tr>
</tbody>
</table>

### How big is a muffin?

- **Cricket ball:** Too large (approx. 120g)
- **Tennis ball:** Max portion (approx. 80g)
- **Golf ball:** Mini portion (approx. 40g)

### How many lollies?

- **125ml cup:** Too large (approx. 90g)
- **100ml cup:** Max portion (approx. 50g)
- **80ml cup:** Mini portion (approx. 25g)
Use marketing techniques to ensure Everyday PRODUCTS are in the right PLACE at a favourable PRICE and are PROMOTED.

**FOUR STEP GUIDE TO MAKING HEALTHY FOOD AND DRINK MARKETING NORMAL**

1. **PROVIDE 75% OR MORE OF EVERYDAY FOODS AND DRINKS IN EACH LOCATION OF THE FOOD OUTLET**

   Locations include the:
   - Drinks fridge.
   - Chilled food cabinet.
   - Hot food display.
   - Shelf unit.
   - Free standing unit.

2. **PLACE ONLY EVERYDAY FOODS AND DRINKS:**

   - At the checkout area.
   - Eye level on shelf/stand units, cabinets, and vending facings.
   - At eye level on all shelf units in the drinks fridge, vending machine, chilled food cabinet, hot food display and free-standing unit.
   - At the main entrance or exit of a food outlet.

3. **PRICE ONLY EVERYDAY FOODS AND DRINKS IN PACKAGE DEALS**

   Package deals include:
   - Buy-one-get one for free.
   - Buy a coffee and get an Everyday snack for a bundled price.
   - Buy an Everyday drink + Everyday meal.
   - Special of the day.

4. **PROMOTE* ONLY EVERYDAY FOODS AND DRINKS:**

   - On menu boards, for example using prominent signage and advertising.
   - On a shelf unit, or on a free standing unit, for example using shelf labels.
   - Chilled drinks fridge, and vending machines, for example using labels, stickers, master branding.
   - In the checkout area, for example using point of sale material.
   - Notice or information areas, for example using print materials such as postcards, leaflets and on the posters, and online materials such as videos.

*The promotion of Everyday food or drink includes master branding, for example where the logo or brand is reasonably associated with an Everyday food or drink.

### Tool 5: Checking against the Food and Drink Benchmark

A guide to use when making a quick check of the food and drink offering in a food outlet against the Food and Drink Benchmark.
Your local team can work together to turn the recommendations in the Framework into strategies to make healthy food and drink normal in your Health facility.

Priority areas of focus and activities will vary according to the unique circumstances of each health facility, for example some health facilities may have already removed sugary drinks from sale or started to remove them, and are ready to focus on achieving the other practices. Others may be just beginning to consider the removal of sugary drinks as a first step.

**CHECKLIST FOR LOCAL IMPLEMENTATION TEAMS**

Considerations for local teams in making healthy foods and drinks normal in your health facility:

- Form a *working group* and identify *stakeholders*.
- Review and develop a plan to put in place supportive *retail leases*.
- Assess the *food and drink choices currently available* to staff and visitors.
- Identify *priority areas for change* to meet the *Food and Drink Benchmark*.
- Agree a plan to *make the changes* to meet the *Food and Drink Benchmark* with an initial focus on the removal of sugary drinks.

An outline of the steps that you can take, and the available tools to use are described for each of these areas in the following section on *Local Implementation*. 
Establishing a working group comprised of people with diverse skills and knowledge will be essential to leading a smooth implementation.

Identifying stakeholders who can be champions will also be important to provide momentum to making healthy food and drink normal in NSW Health facilities.

Suggested functions to include in the working group will be those most impacted by the policy and those tasked with implementing it, for example, Property Managers, Commercial and Finance Managers, Health Promotion and Nutrition and Dietetics. The working group should also consider ongoing plans to communicate and socialise the changes with staff and visitors.
Put in place retail leases incorporating the Food and Drink Benchmark.

REVIEWING EXISTING RETAIL LEASES

STEP 1
Determine if there are specific references in the existing lease that require compliance with NSW Health’s policies and guidelines.

YES
New or amended guidelines can be incorporated

NO
New or amended guidelines can not be incorporated

STEP 2A
- Discuss and seek agreement with the retailer to a transition plan to work towards achieving the new healthy food and drink requirements.
- In weighing-up options to address non-agreement consider:
  - Service continuity offered by the existing retailer.
  - Availability of alternative retail service providers.
  - Possible barriers to the supply of healthier food and drink options to the retailer – real or perceived.
  - Visitor and staff satisfaction with the service levels from the retailer.

STEP 2B
- Approach the retailer and seek agreement to vary the existing lease or enter into a new lease which will include provisions for compliance with the healthy food and drink requirements.
- Consideration may be given to voluntary compliance for the remaining term of the lease in situations where retailers agree to provide healthy food to staff and visitors in accordance with the relevant elements of the Framework.
A revised retail lease template has been prepared to include additional terms at Item 24 of the Lease Particulars in accordance with the degree of compliance with the relevant elements of the Framework required.

The ‘additional terms’ of the retail lease template are supportive of healthy food and drink provision as set out in the Framework – with a particular emphasis on the Food and Drink Benchmark, and Tool 1: Ready Reckoner. The retail lease template includes optional terms dealing with:

- Inspection times.
- Sugary drinks.
- Product availability, product quality, product size and marketing.
- Key terms, for example, sugary drinks, Everyday foods and drinks, and Occasional foods and drinks.

### NSW Health Retail Framework

The NSW Procurement Portal – NSW Health Retail Framework provides NSW Health facilities with support to manage retail outlets including the new retail lease template – a key resource for healthy food and drink provision.

### Key messages for your retailer

NSW Health is taking the opportunity to support everyone who works in or visits our health facilities to move towards a new and healthier normal – we want you to be a part of this important initiative.

The decisions that a retailer makes will determine how easy it is for our staff and visitors to make a healthy choice. By increasing the availability of healthy food and drink options, retailers are making an important contribution to good health in NSW.
FOOD AND DRINK CHOICES CURRENTLY AVAILABLE

Noting the healthy food and drink options available to staff and visitors from food outlets, and comparing the outcome with the Food and Drink Benchmark, will highlight priority areas for change.

ASSESS THE FOODS AND DRINKS CURRENTLY AVAILABLE TO STAFF AND VISITORS

A quick visual assessment of the food outlet can help to identify if:

- No sugary drinks are for sale.
- Mostly Everyday foods and drinks are available.
- Portions for sale are no bigger than the portion size limits.
- Everyday foods and drinks are prominently displayed in key locations, for example, checkout, eye level on shelves, main entrance, in the hot display area.
- Promotions and advertising, for example menu boards, posters, point of sale material, and master branding on chilled drinks fridges is for Everyday foods and drinks.
- All package deals and promotions are only for Everyday foods and drinks.

Tool 5: Checking against the Food and Drink Benchmark

This guide provides examples of how retailers and NSW Health facilities can quickly check compliance against the Food and Drink Benchmark.

Tool 6: Healthy food and drink catering in NSW Health facilities

A guide for caterers to Make Healthy Food and Drink Normal.

Providing healthy foods and drinks when catering at functions, meetings, and special events provides a model for healthy behaviours for staff and visitors to follow. Recommendations that can help NSW Health facilities to achieve this are given in a guide for caterers.

An electronic tool to simplify and automate assessments of foods and drinks in a food outlet will be available at the end of 2017, called PHIMS Nutrition. PHIMS Nutrition is described in the Monitoring and Evaluation section of this Toolkit.
Considerations might include working with your retailer to:

- Raise awareness of the need to change.
- Inform and assist the retailer on what making healthy food and drink normal looks like and, where to find the support materials and tools that are available to help them.
- Identify training requirements for your retailer.
- Work together to create an action plan with clear goals and timelines.

**Tool 2: Online food and drink product information**
- A tool to help retailers understand which branded foods and drinks meet the **Food and Drink Benchmark**. *(To be available end 2017).*

**Tool 7: Healthy food and drink retailing in NSW Health facilities**
- A guide for retailers to **Make Healthy Food and Drink Normal**.

**Tool 8: Questions and answers to guide the retailer conversation**
- A set of questions and answers when engaging retailers to make healthy food and drink normal in NSW Health facilities.

**Tool 9: Healthy food and drink fundraising in NSW Health facilities**
- A guide for fundraisers to **Make Healthy Food and Drink Normal**.

**Tool 10: Marketing materials**
- Resources that can be used to promote making healthy food and drink normal in NSW Health facilities.
Key considerations to *Make Healthy Food and Drink Normal* in NSW Health facilities

- Enlist Senior Executive and management support, partnering and endorsement, to both make and sustain healthy food and drink provision.
- Promote open communication channels for all stakeholders to foster a collective sense of responsibility for making healthy food and drink normal in NSW Health facilities.
- Identify and bring together stakeholders from diverse functions, for example, commercial, health promotion, and retailers, and set up a working group.
- Develop a plan to implement healthy food provision that clearly articulates the vision of senior executives and outlines the scope, goal and key actions.
- Clarify the role and responsibilities of the working group and stakeholders tasked with local implementation.
- Ensure dedicated resources and time to commit to full participation in the planning, design, and delivery of change.
- Develop key messages to retailers encouraging them to support the NSW Health initiative.
- Build a network of practice to share and build new knowledge, and resources amongst NSW Health facilities.
Sharing local initiatives:
Fostering a community of practice will facilitate the sharing of information and resources from Local Implementation. A network co-ordinated by the Ministry of Health with members drawn from all NSW Health facilities working towards making healthy food and drink normal could connect people and provide a way to share information, experiences and build knowledge by:

- Providing a repository of shared resources.
- Providing a forum to identify solutions to common issues and to share successes.
- Identifying lessons learned and sharing this knowledge with others to generate new knowledge.

Supporting programs to normalise healthy choices for staff – Leadership from Nepean Blue Mountains Local Health District (NBMLHD) Get Healthy at Work Steering Committee

The NBMLHD Steering Committee for Get Healthy at Work put forward a proposal to remove sugar sweetened drinks from sale in NBMLHD retail outlets and vending machines as part of improving the health of staff and visitors. The proposal is the first stage of a phasedown approach to reduce the availability of unhealthy food and drinks at NBMLHD facilities. With support from the Steering Committee, chaired by the Chief Executive, the proposal was presented to the NBMLHD Board of Directors and was endorsed in December 2016.

The next steps are working with key stakeholders to support the roll out and developing a communication strategy to inform staff and visitors of the benefits of removing sugar sweetened drinks and making healthy drinks normal.

“This initiative would not have been possible without the vision and support of senior management heading up the Get Healthy at Work Steering Committee. This is a real case of leading by example to improve the health of our population”.
Alejandra Martinez, Senior Health Promotion Officer
Sugary drinks off the menu in Murrumbidgee Local Health District (MLHD) – the #NOsugarydrinks initiative

In just nine months, MLHD removed more than 95% of sugary drinks from sale in all its managed health facilities and gained good support from staff, visitors and the community for the new initiative.

Faced with one in ten people in the Murrumbidgee community living with diabetes, and seven in ten people affected by overweight or obesity, the Chief Executive decided that as a leader in the health service, she needed to set a good example for everyone who walked through the door of a MLHD-managed health facility. Given the clear and compelling link between sugary drinks and overweight and obesity, on 1 April 2016, the Chief Executive called for sugary drinks to be removed and replaced with healthier alternatives.

In setting up a local working group, led by the Healthy Weight Health Promotion Coordinator, the initiative quickly used champions to raise awareness, explain why sugary drinks were being removed from sale, and provide ideas for healthier alternatives. The team provided promotional materials to retailers, and to facility managers to share with staff and visitors to get people on board. The working group, and the Public Affairs team, set about socialising the initiative more widely. Media releases and social media activity, along with the newly minted #NOSugaryDrinks hashtag, were used to help promote healthier drinks. Supporting social media activity by the Make Healthy Normal campaign also increased messaging around water as the best drink. A #NOSugaryDrinks video was developed by MLHD with the Make Healthy Normal campaign, along with a matching infographic. Both were shared widely on social media and the video was broadcast on patient information channels and in waiting areas, where available, throughout the health service.

Summary survey results:

- 7 in 10 people were aware of the policy to remove sugary drinks from sale
- 1 in 2 people supported the removal of sugary drinks from sale
Working together to make a difference – a partnership between the Land and Property Manager and the Public Health Nutritionist in Northern Sydney Local Health District (NSLHD)

Every vending machine in five hospitals in NSLHD now offers healthy foods and drinks. The Land and Property Manager and the Public Health Nutritionist in NSLHD got together in September 2015 to regularly monitor the availability of healthy foods and drinks provided to staff and visitors from food outlets. A winning combination of nutrition and contract management knowledge helped them to easily identify which foods and drinks complied with the policy in place at the time (Live Life Well @ Health: Healthier Food & Drink Choices – Staff & Visitors in NSW Health Facilities) and determine appropriate follow-up actions with the retailer. Pictorial reporting using a floor plan of the Cafés and planograms of Vending Machines enabled quick and easy feedback, while detailed reports highlighted key areas for improvement. The Public Health Nutritionist educated and advised retailers of alternative healthy options and the Land and Property Manager led discussions, negotiations and actions concerning contract compliance.

“I can’t imagine tackling this task without Susan’s [NSLHD Public Health Nutritionist] knowledge of the products and the policy. Her consultative approach with the external vendors made all the difference in getting the necessary changes.”

(Helen Langford, NSLHD Land and Property Manager)
Westmead Hospital – leading by example in WSLHD by removing sugary drinks

A trial to remove sugary drinks from sale in food and vending outlets in Westmead Hospital was launched in March 2017. Leading its community by example, the team at Westmead secured senior executive buy-in by presenting a persuasive case incorporating an evidence-based rationale and potential revenue impacts, gaining the support of the Chief Executive of WSLHD. Subsequent approval and support of facility General Manager and Corporate Services was also a critical step in establishing an authorising environment. The next challenge for the team was to engage the food and vending retailers through:

- Discussions with retailers and vending focusing on their role and importance in changing the health environment.
- A presentation on the local health statistics and why change was important for Westmead as a health facility.
- Emphasising the retailer as a joint partner and leader of the strategy.

“For the first time ever we feel a part of this hospital” (Retailer)

Bringing everyone together was difficult, but also important to ensure there was real involvement of all partners in the planning stage. Retailers (including those sub leased), Corporate services, Procurement, Communications and Health Promotion worked together to plan a trial which required a willingness to compromise on issues such as timeframes and determining which drinks could be stocked. Identifying a trial period together also gave partners confidence that issues could be raised and addressed, unforeseen results could be discussed, and an adjustment period provided where necessary. Product change lead times were agreed once there was an approved list of drinks – and retailers were consulted on and given enough time to restock the retail shelves and vending machines.

The development of a comprehensive Communication Strategy was essential. The target audience included staff, visitors and patients, and social media was used alongside printed campaign materials placed at the point of sale.

- Pre-trial communication informed staff of the changes ahead and gave everyone a voice through an invitation to provide feedback. An email address was provided and every respondent received an email answering their questions, providing evidence based information and a rationale for the trial, and thanking them for their interest and support. People who sent positive messages were invited to become ‘Rethink your Drink’ ambassadors, for which they were provided with training and support. The mail room staff (pictured on the next page) stepped up to the plate and took on the initiative as a team. Proudly wearing ‘Rethink your Drink’ badges, they engaged with people and provided answers to questions as they delivered the mail around the hospital. The insights gathered from the mail team were a valuable basis for the development of the FAQs. Retail sales staff were also encouraged and assisted to be positive supporters of the trial.
- Launch of the trial – media releases, broadcasts, intranet advertising and photo opportunities with the General Manager and retailers provided support for the initiative and a sense of community and event.
- During the trial – ongoing communications will be essential and will use case studies collected through feedback to reinforce ‘making healthier drink choices’ both while at the hospital, but also in daily life.
Lessons learned – the team found that emotive language such as ‘ban’, ‘prohibit’, ‘stand against’, ‘sugar-free zone’ should be avoided to reduce the passionately divided responses these words provoked. However, despite best efforts these were the words the general media used in reporting the initiative. Demonising sugar was also not found to be helpful, whereas messages that focused on positive nutritional value, and helping to make the healthy choice an easy choice, were received more favourably. The Make Healthy Normal message ‘make water your drink’ was also a positive component, and easily incorporated using existing collateral.
NSW Health is leading the way by implementing a technology based system to support the local implementation of the Framework.

Providing an easy-to-use monitoring and reporting system is an essential tool to overcoming known barriers to implementation. A state-wide automated IT system called PHIMS Nutrition (available at the end of 2017) will have a standard tool, processes, and reports, to support NSW Health facilities who are tasked with monitoring and evaluating the food and drink offering in food outlets.

**CHECKLIST**

Considerations in making healthy foods and drinks normal in health facilities by building on our successes and learning:

- Use PHIMS Nutrition to help you.
- Conduct the annual survey against a set of key practices.

**MONITORING AND EVALUATION**

Building on our successes and learning

A model to monitor and evaluate making healthy food and drink normal in NSW Health facilities

**STEP 1**

Survey the food and drink offering in food outlets against a set of key practices

**STEP 2**

Review and share survey results with stakeholders

**STEP 3**

Identify and agree an action plan to make healthy food and drink normal in your health facility

Making healthy food and drink normal in NSW Health facilities
**USE PHIMS NUTRITION**

Use PHIMS Nutrition to complete an annual survey using a set of key practices to assess progress in achieving a healthy food and drink offering in all NSW Health facilities.

<table>
<thead>
<tr>
<th>KEY STEPS</th>
<th>BENEFITS OF USING PHIMS NUTRITION</th>
</tr>
</thead>
</table>
| **STEP 1**  
Survey the food and drink offering against a set of key practices | **A common way to conduct the annual survey**  
Standard questions make the annual survey quick and easy to use so that it can be conducted by most staff. For each question, help is given with definitions, for example terms such as 'checkout area', pictures to assess portion size, and up-to-date reference lists of branded foods and drinks showing required information, for example the Health Star Rating, and whether a product is an *Everyday* or *Occasional* food or drink.  
**Interim surveys to keep on track to meet the annual survey**  
Flexibility to choose when and who to survey, and also what to survey based on selecting the questions of priority from a standard list of questions. |
| **STEP 2**  
Review and share the results | **Reporting**  
Survey results will be automatically stored, enabling easy reporting at different levels (for example State, Local Health District, individual health facility, and retailers) through a set of standard reports which will be in a format that can be easily shared with stakeholders. |
| **STEP 3**  
Identify and agree actions | **Retailer Relationship Management**  
Recorded details about a retailer and their food outlets as well as notes and pictures related to surveys of the food outlets, will facilitate building a dossier. This repository of stored information can inform the development of action plans. |
State-wide annual surveys will help NSW Health to understand how we are collectively tracking to achieving the practices and ultimately how well we are doing to make healthy food and drink normal in NSW Health facilities. They also provide a standard and fair way to report on practice achievement and adoption of the Framework.

Timeline

- May 2017: Framework launched
- November 2017: Delivery of the full monitoring system
- December 2017: Annual survey
- December 2018: Annual survey

- Removal of sugary drinks from sale
- All other practices achieved
The food and drink offering in a food outlet will be assessed each year against a set of key practices. The practices cover product availability, product quality, product size and marketing. The practices relate directly to the Food and Drink Benchmark.

<table>
<thead>
<tr>
<th>Focus Area to Monitor</th>
<th>Examples of Key Practices to Monitor the Four Focus Areas of the Food and Drink Benchmark</th>
</tr>
</thead>
</table>
| **Product Availability** | • Sugary drinks are not sold.  
                             • At least 75% *Everyday* products are stocked in each different in-store location, for example in the chilled food cabinet, hot display unit, and vending machine. |
| **Product Quality** | • Key packaged products have a Health Star Rating of 3.5 Stars and above, for example muesli bars and flavoured milks. |
| **Product Size** | • Some *Everyday* and all *Occasional* packaged products meet the portion size recommendations, for example hot meals, confectionery, and cakes. |
| **Marketing** | • Only *Everyday* products are placed in prominent locations, for example at eye level, at the entrance to a food outlet, and at checkouts.  
                    • Only *Everyday* products are advertised, promoted, and included in package deals. |
REFERENCES

**Advertising**
Visual marketing communication that promotes or sells food and drinks. This includes master branding.

**Cafés, cafeterias**
A food outlet that sells foods and drinks that can be hot, chilled, ambient, packaged, fresh, and frozen. The offering includes meals and seating for customers. Foods and drinks are mainly consumed on the premises.

**Café kiosks and coffee carts**
A food outlet that sells foods and drinks that may be hot, chilled, ambient, fresh, and frozen. Usually has limited or no seating for customers. Foods and drinks are mainly not consumed on the premises.

**Catering for staff functions**
This refers to catering for activities in the health facility which have been arranged for staff purposes. For example, internal staff meetings, meetings with external partners, workshops, conferences, planning days, social events, workforce development activities, professional development by an external organisation, and lectures.

**Everyday foods and drinks**
Meals, snacks and drinks made from foods in the five food groups:
- vegetables and legumes
- fruit
- milk, yoghurt and cheese (or alternatives)
- lean meats, poultry, fish, eggs, tofu, nuts and seeds
- grain foods including bread, pasta and rice
For example, sandwiches, soups, pasta dishes, yoghurt, and fruit.

**Food outlet**
Any situation where foods and drinks are offered to staff and visitors in a NSW Health facility. Examples include cafés, cafeterias, café kiosks and coffee carts, convenience stores and newsagents, other leased retail premises that sell foods or drinks, such as florists and pharmacies, vending machines and catering provided at functions, meetings or special events.

**Fundraising**
Fundraising means the soliciting or receiving of any money, property or other benefit on a charitable basis on behalf of any part of NSW Health. Fundraising is not included in the Framework. However LHDs may choose to include healthy fundraising in their implementation, and some have already done so. For staff who would like to fundraise at work for other organisations such as Lions, Rotary or the local school, we kindly request that you support the Framework by ensuring that a healthy fundraising option is provided.

**Health Star Rating System**
The Health Star Rating is a nationally recognised front-of-pack labelling system developed by the Australian state and territory governments in collaboration with industry, public health and consumer groups. The overall nutritional profile of packaged food is rated from ½ a star to 5 stars. The more stars, the healthier the choice. www.healthstarrating.gov.au

**Master Branding**
This is where a food or drink brand is advertised alone without the promotion of a product. Only logos and brands that are reasonably associated with an Everyday food or drink should be used.

**NSW Health facilities**
A NSW Health facility refers to any building, including the grounds of the building, which is managed by NSW Health, for example the building and campus of hospitals, community health centres or clinics, rehabilitation centres and offices.

**Occasional foods and drinks**
Food and drinks mostly high in saturated fat, sugars and/or salt often with little nutritional value. They are not needed as part of a healthy diet and should be eaten only sometimes and in small amounts.
For example, pies, chips, cakes, sweet muffins, and confectionery.

**Other retail**
A food outlet whose core business is non-food and drink, but does sell a relatively small range of food and drink items, for example chemist, gift shops and florist.

**Sugary drinks**
Sugary drinks are drinks with any sugars added during processing excluding milk drinks. Examples of sources of sugar used to sweeten drinks would include sucrose (commonly called sugar), fructose, glucose, honey and fruit juice concentrate. Examples of drinks not classed as a sugary drink include water (plain or sparkling), milk, flavoured milk, tea, coffee, fruit and vegetable juice.

**Vending machines**
An automated machine that dispenses foods and drinks. The offering may be for foods or drinks only, or a combination of both.

---

# Milk drinks are drinks where the predominant ingredient is dairy milk or a calcium-fortified dairy-milk-alternative, such as fortified soy/almond/rice milk.

EVERYDAY MEALS, SNACKS AND DRINKS

This *Ready Reckoner* provides examples of meals, snacks and drinks typically sold in food outlets, and their classification as *Everyday* or *Occasional* for the purposes of ensuring at least 75% *Everyday* and no more than 25% *Occasional* foods and drinks. It also sets out specific requirements for both freshly made or packaged varieties. Use it to look up meals, snacks and drinks to check you are meeting the Benchmark.

*Everyday* foods, meals and drinks are those made from the five food groups and may also be prepared with items from the *Basic Ingredients List*. Examples of meals, snacks and drinks made from the five food groups are included in the tables following this section.

### FIVE FOOD GROUPS: use these along with items from the *Basic Ingredients List* to make *Everyday* meals, snacks and drinks.

</tbody>
</table>

Continued on the next page.
### 4. LEAN MEATS AND POULTRY, FISH, EGGS, TOFU, NUTS AND SEEDS

Choose lean cuts of meat, trim fat and skin. Includes lightly salted meat alternatives. For unsalted and lightly salted nuts and seeds, see *Everyday* snacks. For coated nuts and seeds, see *Occasional* snacks.

**Eggs**
e.g. boiled, poached, scrambled and omelettes

NOTE: processed (e.g. bacon, chorizo) and crumbed/coated meat (e.g. schnitzel, crumbed/battered fish) are not included in this food group, see *Occasional* foods.

### 5. DAIRY – MILK, YOGHURT, CHEESE AND/OR THEIR ALTERNATIVES, MOSTLY REDUCED FAT

**Plain milk and milk alternatives**
Preferably reduced fat e.g. fresh or UHT, plain milk and milk alternatives such as soy, rice or nut milks which are fortified with calcium.

**Flavoured milk and flavoured milk alternatives**
Preferably reduced fat. Includes iced-coffee flavoured milk and flavoured soy, rice or nut milk alternatives which are fortified with calcium.

**Yoghurt and yoghurt alternatives**
Preferably reduced fat e.g. Greek, natural, plain, soy, flavoured (excludes coconut-milk-based yoghurts). No added confectionery.

**Cheese and cheese alternatives**
Preferably reduced fat e.g. colby, tasty, cheddar. Includes those packaged with plain crackers.

There is no portion size restriction on these *Everyday* foods.

Only serve these packaged foods with 3.5 stars and above. Maximum portion size 500ml, but ensure that smaller sizes are available and promoted.

If you would like to select a healthier version, choose those that are 3.5 stars and above.
**EVERYDAY COLD MEALS**

<table>

### FRESHLY PREPARED ON SITE

- Use only Everyday fresh unpackaged or packaged foods from the five food groups, and prepare using ingredients on the Basic Ingredients List.
- Include 1-2 types of different vegetables (not including potatoes) or salad.
- Use preferably wholegrain and/or high cereal fibre varieties of bread, rice or pasta.
- Added oils, margarine spreads and melted cheese toppings should be used in small amounts.
- Do not add salt during preparation and salty sauces should be used only in small amounts.
- Note: lean ham may be included in Everyday foods.
- Do not deep fry.
- There is no portion size restriction on these Everyday foods.

### PACKAGED

- Only serve these packaged ready-to-eat meals if they are 3.5 stars and above.
- Maximum portion size 450g.

---

Healthy choices in health facilities NSW HEALTH T1-4
### MEALS (EXAMPLES)

#### JACKET (BAKED) POTATOES
Cooked in their skin, split and served with a variety of *Everyday* toppings from the five food groups.

#### BURGER PATTIES/RISSOLES/MEATBALLS/ FALAFEL/VEGGIE
Uncoated varieties e.g. beef, chicken, fish, vegetable, lentil, tofu.

#### DIM SUM, DUMPLINGS, WONTONS AND STEAMED BUNS (BAO)
Steamed or cooked in water/broth/soup and containing *Everyday* fillings from the five food groups.

#### EVERYDAY HOT BREAKFAST
Hot breakfast containing *Everyday* foods from the five food groups.
When using tinned baked beans, choose preferably no added salt or reduced-salt varieties.

### FRESHLY PREPARED ON SITE
- Use only *Everyday* fresh unpackaged or packaged foods from the five food groups, and prepare using ingredients on the *Basic Ingredients List*.
- Include 1-2 types of different vegetables (not including potatoes) or salad.
- Use preferably wholegrain and/or high cereal fibre varieties of bread, rice or pasta.
- Added oils, margarine spreads and melted cheese toppings should be used in small amounts.
- Do not add salt during preparation and salty sauces are used in small amounts.
- Note: lean ham may be included in *Everyday* foods.
- Do not deep fry.
- There is no portion size restriction on these *Everyday* foods.

### PACKAGED

- Only serve these packaged ready-to-eat meals if they are 3.5 stars and above.
- Maximum portion size 450g.

---

All of the above foods and meals are *Everyday* when containing only *Everyday* foods and fillings from the five food groups.

If you add an *Occasional* food such as crumbed/coated meat, sausages or hot chips to any of the above *Everyday* foods then it becomes an *Occasional* food or meal, see next page.
### Occasional hot meals

#### HOT MEALS WITH OCCASIONAL FOODS OR FILLINGS
- Include *Everyday* unpackaged or packaged foods from the five food groups, and prepare using ingredients on the *Basic Ingredients List*.
- Include 1-2 types of different vegetables (not including potatoes) or salad.
- For suitable *Occasional* fillings and foods to use in these foods, see *Occasional* food and fillings, next page.
- Do not add salt during preparation.
- Maximum portion size limits apply.

Only serve these packaged ready-to-eat meals if they are 3.5 stars and above.

Maximum portion size 450g

---

### Occasional hot foods

#### PIES
- Include *Everyday* unpackaged or packaged foods from the five food groups, and prepare using ingredients on the *Basic Ingredients List*.
- Include 1-2 types of different vegetables (not including potatoes) or salad.
- For suitable *Occasional* fillings and foods to use in these foods, see *Occasional* food and fillings, next page.
- Do not add salt during preparation.
- Maximum portion size limits apply.

Only serve these packaged ready-to-eat foods if they are 3.5 stars and above.

Maximum portion size limits apply.

#### SAVOURY PASTRIES/SAUSAGE ROLLS
- Include *Everyday* unpackaged or packaged foods from the five food groups, and prepare using ingredients on the *Basic Ingredients List*.
- Include 1-2 types of different vegetables (not including potatoes) or salad.
- For suitable *Occasional* fillings and foods to use in these foods, see *Occasional* food and fillings, next page.
- Do not add salt during preparation.
- Maximum portion size limits apply.

#### INSTANT FLAVOURED NOODLES/HOT NOODLE CUPS
- Include *Everyday* unpackaged or packaged foods from the five food groups, and prepare using ingredients on the *Basic Ingredients List*.
- Include 1-2 types of different vegetables (not including potatoes) or salad.
- For suitable *Occasional* fillings and foods to use in these foods, see *Occasional* food and fillings, next page.
- Do not add salt during preparation.
- Maximum portion size limits apply.
### OCCASIONAL HOT MEALS (continued)

#### FOODS (EXAMPLES)

<table>

| maximum portion size 500ml                                        | · maximum portion size limits apply. | No Health Star Rating to be applied.  
maximum portion size limits apply. |

Diet or sugar-free drinks sweetened with natural or artificial sweeteners such as stevia or aspartame. Includes juice-based drinks with added intense sweeteners. e.g. diet soft drinks, diet iced teas, diet flavoured mineral waters, diet energy drinks, diet sports waters and sports drinks, diet cordials and no-sugar slushies.

#### SUGARY DRINKS WITH NO NUTRITIONAL BENEFIT MAY NOT BE SOLD IN NSW HEALTH FACILITIES

Sugary drinks are drinks with no nutritional value and which have any sugars added during processing (this excludes milk drinks). Flavoured milk does contain some added sugar, but it also provides nutritional value as it is a source of calcium.

Sugary drinks with no nutritional value include drinks sweetened with sucrose, fructose, glucose, honey/syrup and fruit juice concentrates, e.g. soft drinks, flavoured mineral waters, flavoured water, sports waters, sports drinks, fruit drinks, slushies, cordials, coconut water with added sugar, energy drinks.

### Health Star Rating

- **3.5 stars**

### Portion sizes

Portion sizes have been designed for both adult and children’s health facilities but children’s health facilities may want to consider providing smaller portion sizes where appropriate.

---

* Milk drinks are drinks where the predominant ingredient is dairy milk or a calcium-fortified dairy-milk-alternative, such as fortified soy/almond/rice milk.
# BASIC INGREDIENTS LIST

The ingredients shown on the *Basic Ingredients List* can be used to help you make healthy *Everyday* meals and snacks along with fresh unpackaged or packaged *Everyday* foods from the five food groups. Examples of *Everyday* meals and snacks can be found in *Tool 1: Ready Reckoner*.

```markdown
**Everyday** food item + food from *Basic Ingredients List* = **Everyday** meal or food.
```

## USE THESE INGREDIENTS

*Use these ingredients in recipes and sell foods made with these ingredients*  

### HEALTHY OILS

- Healthy oils e.g. canola, sunflower, olive, grapeseed, corn, soyabean, macadamia and peanut.  
  When selecting healthier oils for your food outlet including for deep-frying (deep-frying makes the food or meal *Occasional*), see the Heart Foundation Healthy Oils program: https://heartfoundation.org.au/programs/healthier-oils-program

- Palm, coconut, palm kernel oils including solid coconut oil for baking and any animal fats such as lard or duck fat.  
- Butter (including lemon, garlic and dairy blends) and cream.

### SPREADS, SALAD DRESSING AND MAYONNAISE

- Margarine  
- Yeast spread (lightly spread or individual portion).  
- Jam/marmalade/honey/golden syrup (lightly spread or individual portion).  
- Red, white, and balsamic vinegar.  
- Lemon or lime juice.  
- Salad dressing made from oils listed above (in small amounts/individual portions) e.g. French, mayonnaise, aioli, ranch and caesar dressing.  
- Nut spreads, for example, almond, peanut, cashew, LSA, only provide if they are 3.5 stars and above.

- Cream, sour cream or cream fraiche and dressings made from these ingredients.  
- Butter.  
- Chocolate nut spread and other nut spreads with a Health Star Rating of less than 3.5 stars.

### PASTRY

- Pastry (puff, shortcrust, filo) only provide if 3.5 stars and above. Filo-type prepared with only small amounts of healthy oils, see above for examples.  
- All other pastry.

### HERBS, SPICES AND SEASONING

- Fresh and dried herbs and spices.  
- Curry powder and pastes.  
- Reduced-salt seasoning packets: e.g. taco seasoning.

- Limit added salts (e.g. Himalayan, rock, table, sea, chicken, popcorn).  
- All other seasonings.

### STOCK

- No-added-salt or reduced-salt stock or soup base.  
- All other non-salt-reduced stock.
### USE THESE INGREDIENTS

*Use these ingredients in recipes and sell foods made with these ingredients*

### DO NOT USE THESE INGREDIENTS

*Do not use these ingredients in recipes or sell foods containing these ingredients*

#### CONDIMENTS, SAUCES AND MARINADES

- Cooking sauces – only provide cooking sauces that are 3.5 stars and above. Prepare sauces according to instructions on the pack if required.
- Tomato paste.
- Tomato and other table sauces, e.g. BBQ, sweet chilli, fish, soy sauce and gravies. Use salt-reduced where available. Use single-serve portions or packs.
- Salt-reduced sauces for cooking (e.g. soy, satay) where available.
- Pesto.
- Cranberry, apple and mint sauces.
- Chutney, pickles, mustard, horseradish, chilli, relish and salsa.
- Marinades (use salt-reduced where available).
- Vinegar (distilled, rice, cider, balsamic).
- Reduced-fat/light coconut cream and milk.

#### BAKING PRODUCTS

- Sugar (brown, caster or raw; single serve packs for use in beverages), honey, and syrups e.g. maple and golden syrup (limit use in recipes prepared centrally or on-site).
- Baking powder, bi-carb soda.
- Cocoa, cacao and desiccated coconut.
- Vanilla essence, other essences and flavours.
- Yeast: instant dried.
- Bread crumbs.
- Flour (preferably wholemeal).
- Pancake and pikelet mix.
- Eggs.
- Artificial or natural intense sweeteners (e.g. aspartame or stevia).
- Food colouring.
- Gelatine, agar.

#### FLAVOURINGS

- Milk flavourings, powder and syrups – use in small amounts (in drinks use no more than 1 level tablespoon per portion).
TOOL 2: ONLINE FOOD AND DRINK PRODUCT INFORMATION

To assist retailers and those in health facilities tasked with the monitoring and evaluation of food outlets, an online tool will be available to help easily determine if food and drink products meet the **Food and Drink Benchmark**.

The three key elements relating to the provision of foods and drinks against the **Food and Drink Benchmark** are the ability to:

- Identify sugary drinks and healthier alternatives.
- Classify foods and drinks as **Everyday** or **Occasional**.
- Determine the Health Star Rating and portion size of foods and drinks, where these are required.

Searchable, online food and drink product information will be available to simplify and automate assessments of foods and drinks in a food outlet in terms of these key **Food and Drink Benchmark** elements. This up-to-date reference information for branded foods and drinks will form a key part of the PHIMS Nutrition standard tool to be launched at the end of 2017.
Use the Recipe flow chart to help you determine if your recipe is Everyday or Occasional.

**RECIPE**

Packaged ingredients have a Health Star Rating of 3.5 stars and above where required* (or are on the Basic Ingredients List)

- Yes
  - Meal recipes include at least 1-2 varieties of vegetables/fruit
    - Yes
      - All meat used is lean
        - Yes
          - There is no salt added and salty sauces are used in small amounts
            - Yes
              - Added oils, dressings, margarine spreads, and melted cheese toppings are used in small amounts
                - Yes
                  - The recipe is not deep fried
                    - Yes
                      - Check: uses wholegrain ingredients where possible
                        - Check: uses mostly reduced-fat dairy

- No
  - Is the recipe for an Occasional food eg muffin, cake?
    - Yes
      - Check maximum portion size
        - No
          - Occasional food – Max 25% of the food and drink offering
    - No
      - Are any ingredients Occasional?
        - Yes
          - OK
        - No
          - Too large
            - Everyday Food – Stock and promote (check max portion size for meals and drinks)

* Flavoured milk and alternatives; Occasional fillings, including crumbed/coated foods, processed meats, hot potato products, garlic bread; lightly salted nuts, seeds, and popcorn; savoury biscuits and salty snacks, including corn chips and hard taco shells/bowls; dried fruits; muesli bars; and custard.
Portion sizes have grown over the last 30 years. Large portions and the kilojoules they contain can send our weight creeping up over time. Selling smaller, more appropriate portions is one way to support people to make a healthier choice.

This tool is a life-size, visual portion guide for commonly used menu items to help you visualise portion sizes for some foods in the Food and Drink Benchmark. Maximum portion size limits apply to some Everyday and all Occasional foods and drinks.

Set the view scale or printer to 100% before viewing or printing.

**CATEGORY:** Occasional frozen ice snack

**FOOD:** ICE-CREAM

**MAXIMUM PORTION SIZE LIMIT:** 85ml

**DESCRIPTION OF PICTURED:**
5cm diameter (approx. 2 inch, #24 scoop)
This guide provides examples of how retailers in NSW Health facilities can quickly check the food and drink offering in food outlets against the **Food and Drink Benchmark**.

It is expected that there will be a staged approach to implementation, a priority target is the removal of sugary drinks from sale by December 2017 with achievement of all four focus areas in the **Food and Drink Benchmark** by December 2018.

A state-wide automated monitoring and reporting system called PHIMS Nutrition will be available at the end of 2017 to support monitoring and evaluation.

### SUGARY DRINKS ARE NOT TO BE SOLD IN NSW HEALTH FACILITIES

**Assess if there are any sugary drinks for sale.**

Sugary drinks are drinks with any sugars added during processing (excluding milk drinks).#

**Sugar can be listed in all sorts of ways in the ingredients list**

If any of the following ingredients are listed on the ingredients panel then the drink contains added sugar and should not be sold.

- Sugar, sugars or words such as sucrose, fructose, glucose, maltose, invert sugar.
- Honey, molasses, golden syrup.
- Syrups such as invert syrup, fruit sugar syrup, rice syrup, agave syrup, coconut syrup, rice syrup or maple syrup.
- De-ionised fruit juice, agave nectar, coconut flower nectar, coconut sugar, maple sugar.

Examples of sugary drinks are soft drinks, some flavoured waters, fruit drinks, cordials, iced teas, energy drinks and sports drinks.

**How do I know if a drink has added sugar?**

# Milk drinks are drinks where the predominant ingredient is dairy milk or a calcium-fortified dairy-milk-alternative, such as fortified soy/almond/rice milk.
PORTION SIZE

PORTION SIZE LIMITS ARE MET

Use Tool 4: Visual portion guide to assess whether cakes and muffins are no bigger than the portion size limit.

Making available cakes and muffins that are no bigger than the portion size limit of 80g is a key recommendation in the Food and Drink Benchmark.

ENSURE ONLY EVERYDAY FOODS AND DRINKS ARE PLACED IN PROMINENT LOCATIONS

Use the following method to assess whether only Everyday foods and drinks are placed in prominent locations.

Prominent locations include the checkout area, main entrance/exit and eye level on shelves.

For example, checkout area
Assess the area at arms’ length of the checkout for Occasional foods and drinks.

The checkout is usually where the cash register is located and is the place where transactions are carried out. There may be more than one checkout of the food outlet.

For example, eye level on shelves and vending machines
Assess shelves and vending machines for Occasional foods and drinks at eye level. Eye level is typically the second and/or third shelf from the top.
PROVIDE 75% OR MORE EVERYDAY FOODS AND DRINKS

There are two types of food and drink displays, pre-portioned/packaged displays and buffet-style displays. In some situations foods are not displayed and only appear on a menu. To check that 75% or more of Everyday foods and drinks are available, each type should be counted in a different way:

- **Pre-portioned/packaged displays**: To assess the proportion of Everyday foods and drinks in locations where only pre-portioned or packaged foods and drinks are displayed, count the number of facings.
  - Examples of pre-portioned foods are a pie, a pre-packed sandwich, a pot of fruit yoghurt, or a slice of cake. Packaged foods include products such as drinks in cans or bottles, packs of confectionery, chips, etc.
  - A facing is a food or drink positioned on the edge of a shelf or at the front of a cabinet facing the customer. Each facing is to be counted as one. For example, in the drinks fridge shown below, the top row has eight facings.

- **Buffet-style displays**: To assess the proportion of Everyday foods in display units where trays of bulk foods are displayed to be plated for, or by, the customer, count the individual food types, rather than the facings.
  - This type of display includes salad bars, and hot food displays serving, for example, lasagne, stir fry, roast meat and vegetables, mashed potato, rice, hot chips.

- **À la carte**: To assess the proportion of Everyday foods where food is ordered from a menu, rather than displayed, count the individual food types listed on the menu.

**Worked example for a pre-portioned/packaged drinks fridge:**

**Step 1:** Count the total number of facings in the drinks fridge.

**Step 2:** Count the total number of facings with Everyday drinks.

**Step 3:** Calculate the percentage of Everyday drink facings in the fridge

\[
\text{Percentage} = \left(\frac{\text{Total number of facings of Everyday drinks}}{\text{Total number of facings in fridge}}\right) \times 100.
\]

For example, there are 40 facings in this drinks fridge, of which 30 are of Everyday drinks = \((30 \div 40) \times 100 = 75\%\).

**Step 4:** If the percentage of Everyday drink facings is 75% or more, the drinks fridge meets the Food and Drink Benchmark.

Note, for buffet-style displays, follow steps 1-4 but replace ‘facings’ with ‘food types’.

A guide to *Making Healthy Catering Normal* – for caterers and staff responsible for ordering catering (for functions, meetings and special events in NSW Health facilities).

**THE WORLD WE LIVE IN HAS CHANGED…**

Portion sizes have increased

Many of us spend hours sitting at work

We are time poor and want quick and convenient food options

We are surrounded by unhealthy foods and drinks at work, at the shops and in public places like hospitals and schools

**ADULTS IN NSW**

*Only 7% eat the recommended amount of vegetables*

*Only 54% eat the recommended amount of fruit*

*3/5 of our daily energy (kJ) comes from unhealthy foods and drinks such as cakes, confectionery, sugary drinks and chips*

**THISPOSESERIous CHALLENGES TO THE HEALTH OF OUR COMMUNITIES…**

*Over half of all adults in NSW are overweight or obese*

*1 in 5 children in NSW are overweight or obese*

*Poor diet and obesity are major contributors to chronic disease in Australia*
Steps to Make Healthy Catering Normal in Health Facilities

The Healthy Food and Drink in NSW Health facilities for Staff and Visitors Framework supports healthy catering through promoting an increase in the availability of healthy (Everyday) options, and limiting the availability and portion size of less-healthy (Occasional) options.

Healthy catering is about making the healthy choice an easy choice for our staff and visitors. This means ensuring that plenty of healthy food and drink options are available when providing meals, snacks and drinks at functions, meetings, and special events (for example, events with external partners, workshops and training days).

Use the three steps below to Make Healthy Catering Normal.

1. Swap Sugary Drinks for Healthier Alternatives

Making healthy catering normal starts with the removal of sugary drinks that have no nutritional value. The strongest evidence for a link between sugar intake and overweight and obesity is for the consumption of these sugary drinks. Water is always the healthiest drink to provide, but there are plenty of popular, healthier options to choose from as well. Sugary drinks should not be offered to staff or visitors at NSW Health functions, meetings and special events.

For more information about selecting Everyday drinks, see the Healthy Food and Drink in NSW Health facilities for Staff and Visitors Toolkit, in particular Tool 1: Ready Reckoner.

Healthier Drinks to Offer

- Water
- Smoothies/Milkshakes
- Plain and flavoured milk
- 99% Fruit juice
- Tea or Coffee
- Diet drinks

What is a sugary drink?

- Sugary drinks are drinks with any sugars added during processing (excluding milk drinks).
- Sources of sugar to sweeten drinks include the ingredients sucrose (commonly called sugar), fructose, glucose, honey and fruit juice concentrate.
- Sources of sugar are listed in the ingredients of a Nutrition Information Panel which can be found on the back of most packaged foods and drinks.
- Examples of sugary drinks are soft drinks, some flavoured waters, fruit drinks, cordials, iced teas, energy drinks and sports drinks.

- Why can 99% fruit juice, and milk drinks be sold? Juices with no added sugar and flavoured milks can be sold because they do have nutritional value. However, maximum portion size limits apply to these drinks, and the Health Star Rating is used for flavoured milks to ensure healthier versions are selected.
Seventy-five per cent (75%) or more of the food and drink offering should be healthy Everyday meals, snacks and drinks made from foods in the five food groups from the Australian Guide to Healthy Eating\(^1\), including water as the healthiest drink. More detailed information on Everyday foods and drinks can be found in the Toolkit, in particular Tool 1: Ready Reckoner.

### EVERYDAY FOODS AND DRINKS TO OFFER WHEN CATERING

#### Lunches
Use mostly wholemeal breads, rolls and wraps, and include lean meats, fish/tuna, eggs, reduced-fat cheeses, and/or different varieties of vegetables or salad ingredients.

Use healthy fats such as seed- or vegetable-based oils and spreads (not butter).

#### Canapés/savoury snacks
Limit deep fried foods and pastries.

#### Sweets
Choose to serve cakes, muffins, sweet pastry and confectionery only rarely. See the next page for appropriate portion sizes. Consider serving a fruit platter or dried fruits and nuts for morning or afternoon tea, rather than offering cakes or biscuits.
3. PROVIDE APPROPRIATE PORTION SIZES

Portion sizes have become much bigger over the last 30 years. Large portions and additional kilojoules (energy) can end up as extra weight. Providing smaller portions is an easy way to support people to make a healthier choice.

When selecting portions for catering, be mindful that most people will select numerous serves. Offering Occasional foods such as muffins, cakes, slices, sweet and savoury pastries, meat pies, spring rolls, or fried foods in small portions gives staff and visitors variety and choice without overeating.

More detailed information on portion sizes can be found in the Toolkit, in particular Tool 1: Ready Recoecker. For example, the maximum portion limit for muffins is 80g (about the size of a tennis ball). Consider offering smaller portions (about 40g, the size of a golf ball), or consider cutting larger muffins in half or quarters.

ADDITIONAL TIPS FOR PROVIDING HEALTHY OPTIONS AND APPROPRIATE PORTION SIZES AT CATERED FUNCTIONS AND EVENTS:

- Always offer water – it is the healthiest option.
- Use smaller cups, plates, and serving spoons. Using smaller serving ware allows people to take smaller portions and avoid over-eating without even noticing the difference. It also helps to minimise food waste.
- Cheese platters: pre-cut cheeses into individual small portions, and provide other foods on the platter such as fresh fruits, nuts, vegetable sticks, cherry tomatoes and/or wholegrain crackers.
- Sandwiches/rolls/wraps – cut into quarters or smaller portions.
- Sauces, spreads and dressings – provide individual portion packs or serve on the side.

NSW HEALTH HAS A NEW FRAMEWORK TO MAKE THE HEALTHY CHOICE AN EASY CHOICE FOR OUR STAFF AND VISITORS BY:

INCREASING THE AVAILABILITY OF HEALTHY FOODS AND DRINKS

DECREASING THE AVAILABILITY OF UNHEALTHY FOODS AND DRINKS

REMOVING SUGARY DRINKS FROM SALE

<tr>
<td>PRODUCT SIZE</td>
<td>Portion size limits apply to some Everyday foods and drinks</td>
<td>Portion size limits apply to all Occasional foods and drinks</td>
</tr>
<tr>
<td>MARKETING</td>
<td>Prominent locations in a food outlet, value pricing, and promotional activities highlight Everyday foods and drinks</td>
<td>Prominent locations in a food outlet, value pricing, and promotional activities do not highlight Occasional foods and drinks</td>
</tr>
</tbody>
</table>

EVERYDAY FOODS AND DRINKS are meals, snacks, and drinks made from foods in the five food groups in the Australian Guide to Healthy Eating. They are to make up 75% or more of the offering. For example, sandwiches, soups, pasta dishes, yoghurt, and fruit.

OCCASIONAL FOODS AND DRINKS are mostly foods high in saturated fat, sugars and/or salt and often have little nutritional value. They are to make up no more than 25% of the offering. For example, pies, chips, sweet muffins, and confectionery.

The Health Star Rating System is a quick and easy way to compare the nutrient content of similar packaged foods. It considers the overall nutritional content of foods and drinks and rates them from ½ a star to 5 stars. The more stars, the healthier the choice.
The strongest evidence for a link between sugar intake and overweight and obesity is for the consumption of sugary drinks. Water is always the healthiest drink to sell and we encourage our staff and visitors to remove sugary drinks from sale and ‘make water your drink’, but there are other popular, healthier options that can be sold.

Swapping out sugary drinks for healthier alternatives is a priority of NSW Health.

For more information about selecting Everyday drinks, see the Healthy Food and Drink in NSW Health facilities for Staff and Visitors Toolkit, in particular Tool 1: Ready Reckoner.

HEALTHIER DRINKS TO SELL

- Water
- 99% Fruit juice
- Smoothies/Milkshakes
- Plain and flavoured milk
- Diet drinks
- Tea or Coffee
- Diet drinks

What is a sugary drink?

- Sugary drinks are drinks with any sugars added during processing (excluding milk drinks).
- Sources of sugar to sweeten drinks include the ingredients sucrose (commonly called sugar), fructose, glucose, honey and fruit juice concentrate.
- Sources of sugar are listed in the ingredients of a Nutrition Information Panel which can be found on the back of most packaged foods and drinks.
- Examples of sugary drinks are soft drinks, some flavoured waters, fruit drinks, cordials, iced teas, energy drinks and sports drinks.
- Why can 99% fruit juice, and milk drinks be sold?
  Juices with no added sugar and flavoured milks can be sold because they do have nutritional value. However, maximum portion size limits apply to these drinks, and the Health Star Rating is used for flavoured milks to ensure healthier versions are selected.

* Milk drinks are drinks where the predominant ingredient is dairy milk or a calcium-fortified dairy-milk-alternative, such as fortified soy/almond/rice milk.
Alfred Hospital

Alfred Health in Melbourne implemented a healthy food and beverage policy in late 2015 to promote access to healthier food and drink options in health settings. One intervention to implement the policy was to remove sugary drinks from display in the self-service Alfred Hospital café. All drinks sales were measured for five weeks before and six weeks after implementation. The Alfred Hospital reported that:

- weekly sales of sugary drinks decreased from 33% to 10% of total sales
- other drink sales increased and the overall sales volume was unchanged
- the retailer chose to continue with the strategy after the trial period.

WE ASK FOR YOUR SUPPORT TO MAKE HEALTHY FOOD AND DRINK NORMAL

# milk drinks include flavoured milk, milkshakes/smoothies, coffee, liquid breakfast drinks
Why has NSW Health launched the Healthy Food and Drink in NSW Health Facilities for Staff and Visitors Framework?

Reducing overweight and obesity is a priority for the NSW Government as it is associated with a wide range of chronic health conditions including Type 2 diabetes, cardiovascular disease, stroke and some cancers. Eating too many unhealthy foods and not enough healthy foods is a major contributor to overweight and obesity – one in two adults and more than one in five children in NSW are overweight or obese. However no single action will be able to tackle overweight and obesity. Providing healthier food and drink options in food outlets in NSW Health facilities is part of a range of initiatives that the NSW Government is introducing to make healthy normal. NSW Health has a responsibility for the wellbeing of our staff and visitors. This includes creating a healthy food and drink environment that makes the healthy choice an easy choice.

What is the Framework?

The Framework is a NSW Health policy document that outlines how NSW Health facilities can move towards a healthier food and drink offering over the next few years. NSW Health facilities will be asked to work initially towards removing all sugary drinks with no nutritional value for sale by December 2017 and then work to meet the recommendations for a healthy food offering by December 2018. Tools and resources will be provided to support implementation. The Framework and Toolkit can be found at: www.health.nsw.gov.au/healthy

What is the overall aim of the Framework?

The Framework aims to support our staff and visitors to make the healthy choice an easy choice by increasing the availability of healthy options to 75% or more of the menu and decreasing the availability of less healthy options to no more than 25% of the menu, including the removal of sugary drinks for sale.

Will all NSW Health facilities implement the Framework?

While the Framework constitutes a Guideline document that establishes best practice, the intention is that the Framework is adopted across applicable NSW Health Organisations unless a sound reason exists for departing from the recommendations. Furthermore, the Framework has broad support from Senior Executives and managers who have been involved in its development.

How could the policy affect retailers who have a current contract or lease agreement in place?

If the existing retail lease contains clauses or specific references for compliance with the Landlord’s / NSW Health’s policies and guidelines, as amended from time to time, a transition plan to work towards achieving the new requirements in the Framework can be discussed and agreed between the retailer and the relevant manager in the NSW Health facility to work towards achieving the new healthy food and drink requirements.

Where clauses or specific references are absent, independent legal advice should be sought to review the current lease and to understand the legal position in seeking a variation to the lease.

How could the policy affect retailers who are about to sign a new contract or lease agreement?

An updated lease template is available to use in new tenders and retail leases. The updated template includes ‘additional provisions’ that are supportive of healthy food provision as set out in the Framework, with a particular emphasis on the Food and Drink Benchmark. The template is available from the NSW Procurement Portal.
Will customers choose to purchase healthier products?

There is an increasing demand for healthier foods in general in Australia1. Through implementation of the Framework, NSW Health facilities will increase the availability and promotion of healthy options to make the healthy choice the easy choice. Promotional materials will also be available to communicate the benefits of making healthy choices to customers.

Will retailers be able to source healthy foods and drinks?

In practice, it is expected that retailers will be able to comply with the new Framework by increasing their existing range of healthy food options and replacing sugary drinks with a range of alternative drinks that are available such as water, diet soft drinks, 99% juices, flavoured milk products, smoothies, milkshakes, tea and coffee. The Toolkit provides a list of meals, snacks and drinks that comply with the Food and Drink Benchmark and a food and drink database will be available at the end of 2017 to assist retailers with identifying compliant products.

How can retailers support NSW Health to make healthy food and drink normal in Health facilities?

The Framework provides a great opportunity for retailers to support their customers to make the healthy choice the easy choice. There are already a number of examples where retailers and Local Health District staff are working closely together to create a healthier food and drink offering for staff and visitors. Communication about the Framework to all staff and visitors in Health facilities at the time of launch will further assist in creating customer support for making healthy food and drink normal.

NSW Health anticipates that retailers will work closely with staff in Health facilities and use the Toolkit to make the required changes to meet the recommended Food and Drink Benchmark. They will also be expected to participate in an annual audit against a set of key practices that reflect the Food and Drink Benchmark.

Where can I obtain further information?

More information on the Framework, including the Toolkit and details of the Helpline to contact can be found at: www.health.nsw.gov.au/heal.

1 IN 5 CHILDREN IN NSW ARE OVERWEIGHT OR OBSESE

POOR DIET AND OBESITY ARE MAJOR CONTRIBUTORS TO CHRONIC DISEASE IN AUSTRALIA
The Healthy Food and Drink in NSW Health facilities for Staff and Visitors Framework supports healthy eating through promoting an increase in the availability of healthy (Everyday) options, and limiting the availability and portion size of less-healthy (Occasional) options.

Healthy fundraising can be a part of this, by making the healthy choice an easy choice for our staff and visitors, and ensuring that plenty of healthy food and drink options are available, as well as favourably priced and promoted.

Two simple steps can set the scene for Making Healthy Fundraising Normal in NSW Health Facilities.

### 1. Swap Sugary Drinks for Healthier Alternatives

If you had to choose only one action to make healthy food and drink fundraising normal, we would recommend removing sugary drinks that have no nutritional value\(^1\). The strongest evidence for a link between sugar intake and overweight and obesity is for the consumption of these sugary drinks\(^2\). Water is always the healthiest drink to sell or provide, but there are plenty of other popular, healthier options to choose from as well.

#### Ideas for Healthier Drinks to Sell

- **Water**
- **99% Fruit Juice**
- **Smoothies/Milkshakes**
- **Plain and flavoured milk**
- **Diet drinks**
- **Tea or Coffee**

### What is a sugary drink?

- Sugary drinks are drinks with any sugars added during processing (excluding milk drinks)\(^*\).
- Sources of sugar to sweeten drinks include the ingredients sucrose (commonly called sugar), fructose, glucose, honey and fruit juice concentrate.
- Sources of sugar are listed in the ingredients of a Nutrition Information Panel which can be found on the back of most packaged foods and drinks.
- Examples of sugary drinks are soft drinks, some flavoured waters, fruit drinks, cordials, iced teas, energy drinks and sports drinks.
- Why can 99% fruit juice, and milk drinks\(^*\) be sold?

  Juices with no added sugar and flavoured milks can be sold because they do have nutritional value. However, maximum portion size limits apply to these drinks, and the Health Star Rating is used for flavoured milks to ensure healthier versions are selected.

\(^*\) Milk drinks are drinks where the predominant ingredient is dairy milk or a calcium-fortified dairy-milk-alternative, such as fortified soy/almond/rice milk.
Some success stories

Murrumbidgee Local Health District

Murrumbidgee Local Health District led the way and removed sugary drinks in December 2016 with other Local Health Districts following. Experience from the Alfred Hospital in Melbourne, where sugary drinks were removed from display in a café, showed that consumers made healthier drink choices but retailer sales were not affected.

The United Hospital Auxiliaries

The United Hospital Auxiliaries of NSW passed a resolution in 2016 seeking to ensure their fundraising vending machines in NSW Health facilities offer healthy options such as water, dried fruit and nuts (in addition to less healthy options). NSW Health applauds their leadership in this initiative.
2. PROVIDE SMALLER PORTIONS

Portion sizes have become much bigger over the last 30 years. Large portions and additional kilojoules (energy) can end up as extra weight. Selling smaller portions is an easy way to support people to make a healthier choice.

- For example, we recommend that the maximum portion for cakes and muffins is 80g (around the size of a tennis ball).
- For drinks other than water (even the healthier ones), we recommend a maximum portion size of 500ml while also ensuring that smaller sizes are available and promoted.

How big is a muffin?

These two actions are just the beginning. If you’d like more information on healthy food and drink in NSW Health facilities and additional actions you can take as a fundraiser to support a healthier food environment in your facility, see www.health.nsw.gov.au/healthchoices.
Individuals and groups in health facilities tasked with engaging the local media, staff and visitors about the policy may use a variety of new and existing marketing materials.

Marketing materials and resources that will be made available from launch and during the course of implementation include:

- A sample media release.
- Sample social media posts.
- Promotion material for staff and visitors.
- Frequently Asked Questions.

Existing materials from supporting programs can also be used to promote *Making Healthy Food and Drink Normal* in NSW Health facilities. Some examples include resources from the *Make Healthy Normal* campaign and *Get Healthy at Work* program:

### Make Healthy Normal

*Make Healthy Normal* is an on-going social marketing campaign which motivates people to reassess their lifestyle choices and encourages new healthy eating and active living behaviours. It also drives people to existing NSW Health programs. Visit the website for more information ([www.makehealthynormal.nsw.gov.au](http://www.makehealthynormal.nsw.gov.au)).

### Get Healthy at Work

*Get Healthy at Work* is a program that aims to improve the health of working adults by giving workplaces tools and support to address: healthy eating, healthy weight, physical activity, active travel, smoking and alcohol consumption. The program has also been recruiting government workplaces ([www.gethealthyatwork.com.au](http://www.gethealthyatwork.com.au)).
Make Healthy Normal social marketing resources to promote healthy eating and active living are available for use in your health facility. Below is a resource developed with Murrumbidgee Local Health District for their #NOSugaryDrinks initiative. Contact the campaign staff via the website (www.makehealthynormal.nsw.gov.au) or email to makehealthynormal@doh.health.nsw.gov.au.

**SUGARY DRINKS**

*a major contributor to overewight * obesity *tooth decay*

**AVERAGE DAILY AUSTRALIAN SUGAR INTAKE**

14 TEASPOONS

14 - 18 year olds consume an average of 22 teaspoons a day

**1 IN 2 AUSTRALIANS ARE CONSUMING MORE SUGAR THAN RECOMMENDED**

There are 10 teaspoons of sugar in 375ml can of soft drink

**IN AUSTRALIA MORE THAN 1/2 SUGAR INTAKE COMES FROM DRINKS**

Drinking one can of soft drink a day can lead to a weight gain of 6.5kg in one year

**MAKE WATER YOUR DRINK**

**SHIFT WORK AND LATE NIGHT ROUTINES CAN BE TOUGH**

Working long hours and switching from one shift to another can play havoc with your mind and body.

**KEEP YOUR ENERGY STABLE**

Keep up your energy for longer with nutritious snacks like fresh fruit, nuts and dried fruit, whole grain bread/crackers with nut butter or low fat cheese.

**A FRESH APPROACH**

Drink water whenever possible. Drink it cold, sparkling or with a twist of lemon. Tea (unglazed green or herbal) are also a good option.

1. Refers to free sugars (added sugars and sugar naturally present in honey, fruit juice and fruit juice concentrates) ABS 2016 Australian Health Survey Consumption of added sugars 2011-12.
2. World Health Organization Recommendations 2015. There is no Australian recommendation for sugar other than to limit the intake of added sugars.

**WWW.MAKEHEALTHYNORMAL.NSW.GOV.AU**
Simple steps to a healthier you

Make daily changes for a healthier, more energetic you:

- Eat more fruit and vegetables
- Choose smaller portions
- Be active everyday
- Drink water
- Sleep well

Take your first step today.
